Requisition Description

Engagement Type: Contract

Short Description: 11-15 years of experience. Formulates and defines systems scope and objectives based on both user needs and a thorough understanding of business systems and industry requirements.

Complete Description:

- Gather and translate business requirements into detailed, production-level technical specifications, creating robust data models, data analysis features and enhancements.
- Create reports using Crystal Reports/Birst Business Intelligence with Oracle 11g/12c as a back-end database.
- Proficiency in the area of requirement gathering and functional analysis.
- Extensive experience SQL and PL/SQL Optimization to improve run time performance of reports.
- Write complex database objects like Stored Procedures, Functions, Packages and Triggers using SQL and PL/SQL.
- Modify existing reports and/or to develop new reports by analyzing databases, data sources, and structures for the benefit of Users.

----- CONTRACT JOB DESCRIPTION Responsibilities: 1. Formulates and defines systems scope and objectives based on both user needs and a thorough understanding of business systems and industry requirements. 2. Devises or modifies procedures to solve complex problems considering computer equipment capacity and limitations, operation time, and form of desired results. Includes analysis of business and user needs, documentation of requirements, and translation into proper system requirements specifications. 3. Provides consultation on complex projects and is considered to be the top level contributor/specialist of most phases of systems analysis, while considering the business implications of the application of technology to the current and future business environment. Minimum Education/Certification Requirements : Bachelor's degree in Information Technology or related field or equivalent experience; or a current Project Management Professional (PMP) Certification
