Requisition Description

Engagement Type: Contract

Short Description: The Child and Family Services Agency (CFSA) is looking for an application specialist web development using Bootstrap or other responsive libraries to design, develop and implement a portal to support our Family First initiative.

**Complete
Description:**

This position focuses on the front-end development web application component which will use the React framework with JavaScript, HTML and CSS. The successful candidate will develop a portal for community based organizations to login to access CFSA services. Responsibilities: 1. Demonstrates expertise in conveying technical and functional concepts for a specific technical specialty. 2. Identifies improvements to project standards to achieve high quality services/products. This is a professional position which may require subject matter expertise consistent with demanding and rare technological skills. 3. May require coordination of programming activities being conducted by the application development team 4. Confers with other business and technical personnel to resolve problems of intent, inaccuracy, or feasibility of computer processing and project design. 5. Works with necessary personnel to determine if modifications are necessary with interested personnel to determine necessity for modifications or enhancements. 6. Leverages excellent written and verbal communication skills to develop new business process and programming solutions as directed by business and technical stakeholders. 7. May coordinate activities of application developers. 8. Able to identify best practices and standards for the use of the product. 9. Proven track record of hands-on technical design and code work within large complex systems. 10. Proven hands-on technical work with a variety of technologies. 11. Demonstrated technical expertise integrating a variety of diverse technical environments and cross-platform technologies. 12. Delivers support and design for industry specific applications that require integration with statewide systems or applications. 13. Interacts with executive level business users or technical experts. 14. Advanced experience in the required technical subject matter. 15. May function as a niche technical SME (Subject Matter Expert). 16. Has proven experience across large and complex implementations and systems. 17. Gather and translate business requirements into state of the art web application. 18. Use agile software development methodologies to deliver iterative products. 19. Document software code for future enhancements. Minimum Education/Certification Requirements : Bachelor's degree in Information Technology or related field or equivalent experience -----
--- CONTRACT JOB DESCRIPTION Responsibilities: 1. Provides assessments of technical and operational practices based on leading industry standards specific to the requested technology. 2. Plans, organizes, and conducts research in a variety of areas, such as new or existing products, science, social science, law or business in support of an IT initiative. 3. Searches sources such as reference works, literature, documents, newspapers, statistical records, and other sources of information. May use Internet, Intranet, magazines, periodicals, journals, and other media to perform research. 4. Analyzes information and statistical data to prepare reports and studies for use by professionals. Minimum Education/Certification Requirements : Master's degree in Information Technology or related field or equivalent experience
